### Experience

**Objex, Inc.** (apr 2022 - Present) [Link](#)

Full time / Full Stack Developer

- Instrumental in building a dynamic and user-friendly website that empowers users to manage their social media presence with ease.
- Developed a platform that allows users to create their own blog profile, publish posts, and create and manage events.
- Implemented powerful social media management tools for viewing social insights and metrics.
- Integrated with third-party service providers like SendGrid and Stripe for email and financial services.
- Utilised Google Cloud Services such as Cloud Functions, Secrets Manager, and Cloud Storage for a cutting-edge serverless microservices architecture. Built a flexible and scalable document-based database using Firestore.
- Created front-end designs using Figma mockups and styled with Tailwind. Developed backend APIs using Node.js, JavaScript, TypeScript, and Python. Utilised various Firebase services like Remote Config and Analytics to enhance the user experience.

**Umbish** (Feb 2022 - Apr 2022)

Internship / React Developer

- Developed responsive front-end websites using custom CSS and React.js, enhancing user experience.
- Integrated APIs to improve site functionality and collaborated on user interface enhancements.
- Contributed to the creation and maintenance of reusable React components.
