Career objectives

I am an experienced Web Developer who maintains a persistent commitment to expanding my knowledge and skills. I am always eager to acquire new competencies that are relevant to my professional responsibilities. I remain dedicated to continuous learning and growth with over a year of practical experience in this field.

Experience:

Junior Software Engineer (Bengal Software)

Responsibilities:

- Design and build web applications/systems based on wireframes.
- Work on the front-end development of core scripts using React, Bootstrap, and Tailwind CSS.
- Create responsive web applications compatible with all web browsers and mobile devices.
- Analyze client specifications and provide concise updates on project progress.

SKILLS:

Technologies:

- **Expertise:** JavaScript, React, Redux, NextJs, HTML5, CSS3, Bootstrap, Tailwind CSS, Material UI.
- **Comfortable:** Node JS, Express JS, MongoDB, Rest API, Firebase, Git.
- **Familiar:** With TypeScript, Stripe, Postgress, Prisma, and Material UI.

PROJECTS:

(i) Travel-Gide

[Live Link](#), [Client Link](#)

Overview: It constitutes an excellent and user-friendly online platform catering to the needs of travelers.

Features:

- User-friendly dashboard with multiple users.
- This web application grants authorized users full access to manage and oversee all available services.
- It has a booking system for the traveler and a confirmation feature that users ensure their booking info.

Technology Used: Next.js, Vercel, MongoDB, Firebase, Tailwind CSS, Ant Design.

(ii) Dream PC

[Live Link](#), [Client Link](#)

Overview: An online platform facilitating the selection and assembly of components for constructing customized and professional-grade Personal computers.

Features:

- This platform makes it easy for users to find all computer components with user-friendly categories.
- Facilitate the seamless purchase of PC components through the simplest and most user-friendly process.
- This website loads and shows information quickly, making it quick and easy to use.

Technology Used: Next.js, Redux, MongoDB, Express.js, Next Auth, Ant Design.

(iii) Review Meal Item

[Live Link](#), [Client link](#), [Server Link](#)

Overview: This website is designed for food enthusiasts seeking top-quality meals at affordable prices.

Features:

- Real users can share their thoughts on food, and check out the list of delicious options on the site.
- When a user clicks on a specific meal item, the system displays all reviews with that particular dish.
- There are separate pages for each review, focusing on specific feedback for a particular dish.

Technology Used: React, Vercel, MongoDB, Firebase, React Query, Tailwind CSS.

EDUCATION:

BSc in CSE | Daffodil International University, Dhaka | CGPA: 3.24 | 2018 to 2022

EXTRACURRICULAR ACTIVITIES:

- Participated in the Computer Programming Contest (CPC) hosted at Daffodil International University.
- An active member of the Computer Programming Club and Robotics Club at Daffodil International University.

LANGUAGE:

English | Bangla(native) | Hindi
